Getting started

About this guide

The *CallPilot Programming Record* includes:

- a list of programming tasks for setting up your CallPilot system
- tables you can use to record CallPilot programming
- tables you can use to record CallPilot Fax and Message Networking programming, if you have these options installed. To record Contact Center programming, refer to the *Contact Center Set Up and Operation Guide*
- system defaults for Avaya Business Communications Manager (Avaya BCM).

Use this guide to record how you program your Avaya Business Communications Manager system. You can also use this guide as a reference when you make changes to CallPilot programming.

Note: Make copies of the pages in this guide as required.

Audience

This guide is for CallPilot system administrators.

Using this guide

Use the tables in this guide to assist you with CallPilot programming. To use the programming record tables:

- 1 Determine which options apply to your system.
- 2 Refer to the task and page number shown in the table below.
- 3 Decide whether you want to change or keep a default setting. The defaults are shown in **bold**.
- 4 If you change the default, write information in the space provided, or circle an option.

The following table lists which programming record table to use for each programming task.

For these programming tasks	Refer to
